

## State of Florida Flag Initiative

The Florida League of the South asserts that it is imperative we restore the sovereignty of our state.

The central government in Washington, D.C, was created by sovereign States as an agent for their common interests and was thus delegated few, specific powers. All other powers were retained by the States and the People. But all of this has been overturned by military force, court decisions, laws, and executive orders not pursuant to the intent of the Founders. Just as our ancestors feared, the central government has become supreme, defining the limits of its own power. The States have been relegated to the role of mere departments in a nationalized system.

The first step in the return journey to State sovereignty *must* take place in the minds of the People. Citizens should look first to their States and Local Communities, and not to Washington D.C. Yet, few Florida flags, the symbol of State sovereignty, are flown to remind our People where their loyalties and responsibilities primarily belong. The federal flag, however, is flown widely at the expense of State interests, our eyes being diverted from Tallahassee to Washington D.C. The Florida League of the South recognizes this must change. We seek to restore the pride of our People in the Sovereignty and heritage of their State. We want Floridians to think of Florida first.

Therefore, we ask everyone in the sovereign State of Florida from government, business, to private citizens to proudly display the State flag. There is no reason why the U.S. flag should fly over the Florida State Capital or any other state or local governmental building. Moreover, service stations, car dealerships, restaurants, libraries, schools, and homes should be encouraged to wave the State flag and not the Federal banner.

This is Florida, and we are *not* a preserve of the government in Washington D.C. Let's stop acting like we are and thus begin the journey back to Sovereign State Government.

- Show your pride, and fly your state flag!

If you really want change, please consider the League of the South.

## THE LEAGUE OF THE SOUTH'S STATEMENT OF PURPOSE

**We seek to advance the cultural, social, economic and political well-being and independence of the Southern people by all honorable means.**
